

Senate Bill 272

Approved on October 11, 2015, SB 272 adds a section to the California Public Records Act requiring local agencies to create a catalog of Enterprise Systems by July 1, 2016 with annual updates.

Enterprise System

A software application or computer system that collects, stores, exchanges and analyzes information that the agency uses that is both of the following:

- A multi-departmental system or a system that contains information collected about the public.
- A system that serves as an original source of data within an agency.

An Enterprise System does not include any of the following:

- Information Technology security systems, including firewalls and other cybersecurity systems.
- Physical access control systems, employee identification management systems, video monitoring and other physical control systems.
- Infrastructure and mechanical control systems, including those that control or manage street lights, electrical, natural gas or water or sewer functions.
- Systems related to 911 dispatch and operation or emergency services.
- Systems that would be restricted from disclosure by Section 6254.19.
- The specific records that the information technology system collects, stores, exchanges or analyzes.

Requirements

1. Create a catalog of enterprise systems, containing:
 - Current system vendor
 - Current system product
 - System's purpose
 - A description of categories or types of data
 - The department that is the prime custodian of the data
 - The frequency that system data is collected
 - The frequency that system data is updated
2. To make the catalog publicly available upon request
3. To post the catalog in a prominent location on the agency's website

Exception

If the public interest served by not disclosing the information described clearly outweighs the public interest served by disclosure, the local agency may instead provide a system name, brief title or identifier of the system.

City of Monterey Enterprise Systems Generated June 01, 2024

Product	Vendor	Purpose	Data Category	Custodian	Collection frequency	Update frequency
22 Miles	22 Miles	Digital display software	Other	City Manager Dept - Conference Center Division	As Needed	As Needed
ArcGIS	ESRI	General purpose GIS software system used for sharing GIS resources (maps, geodatabases, and tools).	Geographic Information Systems	Information Resources Department	Daily	Daily
AutoTurn	Transoft Solutions, Inc.	Assess vehicle turning space for designers, planners, architects or engineers	Engineering	Public Works - Traffic Engineering	As Needed	As Needed
Bang the Table	Granicus, Inc.	Complete suite of listening, information, analysis, reporting and relationship management features, enabling our clients to mix and match precisely the right online tools for their community engagement objectives	Customer Information System	City Manager	As Needed	As Needed
BlueBeam Plan Revu	BlueBeam Inc	Online Plan Review	Permit System	Community Development - Permits & Inspection	As Needed	As Needed
