My name is Hal McKay. My wife, Esther and I have lived at 5 Toda Vista for 33 years. I am retired from the Monterey Fire Department after 25 yrs. I am about 90% disabled from my injuries on the job. I have a constant pain level of an 8 on a 0 – 10 scale. I have two spinal cord stimulators that cover both of my arms from my shoulder to my fingertips. The other stimulator covers both of my legs from my hips to my toes. I cannot have an MRI because they are not compatible with my stimulator. Putting this cell tower so close to our 2 story bedroom windows will make it so I will never be able to use my stimulator which will increase my pain level to a 10 out of 10 and reduce my sleep to 0. I hope the subcommittee will consider tight restrictions within the residential neighborhoods, to include no closer than 500 feet to a home and 1500 feet between poles as Petaluma, CA is.

With this device in front of our house my wife and I will have to move. Who is willing to compensate us the 20% devaluation of our home because of the cell towers? Is the city, ExteNet, or Verizon going to? My wife and I love this area and carefully picked out the location of our home. We have supported this city for a long time. Now that we are both retired we live on a fixed income. Having to move and start all over again is an option that is not available to us. We should not have to uproot our lives and have me live in constant pain so a company can make more money. This is something no one should have to do.

Technology should never be at the risk of endangering the citizens, animals and the environment. Utilities should be placed underground.

Please forward to the Wireless Subcommittee members before the August 23rd meeting. Thank you.

Re: In favor of the Wireless Ordinance drafted by the Residents

Dear Wireless Subcommittee: Mike Dawson, Mike Brassfield, Susan Nine, Lois Hansen, Duane Peterson, Hebard Olsen and David Breedlove.

Unfortunately I will not be able to attend the Wireless Subcommittee meeting on Thursday, August 23rd. I want to voice my support of the adoption of the wireless ordinance proposals from our highly qualified neighborhood group. I believe this wireless ordinance offers the residents better control of wireless equipment, conditions, and placement of such, in their own neighborhoods. This wireless ordinance will clearly strengthen protective measures for the residents. Mr. Sam Ezekiel, being a telecommunications executive, also added much valuable input into protective measures for the residents that Mr. Van Eaton overlooked. This ordinance drafted by the qualified neighborhood group will not only reduce fire risks in Monterey, but will protect our aesthetics, along with peace of mind for those who don't want a cell tower on their property in the future. We as residents have the right to choose, so the neighborhood ordinance drafted by the residents should absolutely be adopted for all these important reasons.

I oppose the wireless ordinance drafted by Van Eaton, as it does not support the rights of the residents to choose on such an important issue that will directly affect our lives.

Sincerely,

Charisse Carlile
Monte Vista Resident

I support the adoption of the wireless ordinance proposal drafted by the qualified residents in our neighborhood group. It gives the residents more control on wireless communication equipment being installed in our neighborhoods and the right to choose.

Thank you,

Marie C. Aliotti

Regarding: In favor of the Wireless Ordinance drafted by the Monterey Residents

Dear Wireless Subcommittee:

We support the adoption of the Wireless Ordinance proposals drafted by the qualified Monterey Residents in our neighborhood group. It gives the residents more control on wireless communication equipment being installed in their neighborhood and the right to choose.

We oppose the Wireless Ordinance drafted by Mr. Van Eaton, as it does not support the rights of the residents to choose on such a vital issue that will directly affect our lives and protection rights.

TO THE COMMITTEE:

This nonsense of opening the door to dangerous cell towers in our residential neighborhood has to stop! I have clearly expressed my objection during the ExteNet/Verizon crisis. I don't want to stand for hours in the crowded chambers again, just to remind you of your obligation to the local public whose best interests you should have in mind during the decision-making process.

The Monte Vista Neighborhood Association has provided you with a carefully drafted ordinance: use it as your primary resource when crafting our new city ordinance. Why are you looking to other states' models for guidance?

Don't let anybody rush you! You must take time for careful consideration of what is best for our neighborhood. Reject Van Eaton's proposals. Start with the MVNA resident drafted ordinance. We still have regulatory authority under state and federal laws; it mustn't be squandered away like in other states.

Be strong and hold your ground; don't be bullied by staff! We want you to come up with the best possible ordinance without outside interference and irrelevant input.

Sincerely,
Susanne Piccari, homeowner
