

PUBLIC WORKS DEPARTMENT

Marina Parking Lot Improvement Project

The Marina parking lot, the second phase of the Waterfront parking lot area improvements, will be in construction this Winter 2022. The project will realign the parking lot to improve vehicular and pedestrian circulation, rehabilitate the pavement and implement stormwater control measures to improve water quality discharged to the Monterey Bay. The project includes a revised recreation trail alignment to eliminate multi-lane vehicle conflict points, raised crosswalks to improve bike and pedestrian crossings and an enhanced lighting configuration. Once complete, the parking lot will circulate directly with the phase 1 waterfront parking lot rather than serving as a separate lot. A primary goal during construction will be to maintain access to all facilities, including the Waterfront parking lot, the Monterey Coastal Recreational Trail, the Marina boat launch, Fisherman's Wharf (1) and Municipal Wharf II and all associated businesses, to the maximum extent feasible. The project is anticipated to have a 120 working day duration and will be completed prior to Memorial Day 2023. Further information will be provided once a schedule is developed.
